

MASTER SERVICES & DATA PROCESSING AGREEMENT

Synthetic 100-page legal-style document for RAG testing

Document ID	LEGAL-MSA-2026-077
Owner	Legal & Compliance Team
Version	v2.4
Status	Controlled Test Document
Organization	Northstar Digital Solutions Pvt. Ltd.
Purpose	Synthetic document for RAG retrieval and evaluation

This document is fictional and was created solely for application testing. Names, dates, policies, project details, and legal provisions are synthetic.

Notice

This is a fictional synthetic document. It is not legal advice, is not an executed agreement, and does not represent a real company's legal terms. It is designed to test retrieval, cross-document question answering, clause lookup, and long-context handling.

Parties

Northstar Digital Solutions Pvt. Ltd. ('Northstar') and Meridian Harbor Technologies Ltd. ('Client') are fictional entities used only for this test corpus.

Article 1 — Definitions

Section purpose. This section describes agreement and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Agreement

Agreement is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-101, Personal Data, Services.

RAG test markers: page-003; control-051; anchor-LEGAL-101.

Article 2 — Scope of Services

Section purpose. This section describes service descriptions and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Service descriptions

Service descriptions is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-102, SOW-07, acceptance.

RAG test markers: page-004; control-068; anchor-SOW-07.

Article 3 — Fees & Payment

Section purpose. This section describes taxes and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Taxes

Taxes is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-103, NET-30, invoice dispute.

RAG test markers: page-005; control-085; anchor-invoice dispute.

Article 4 — Term & Renewal

Section purpose. This section describes expiration and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Expiration

Expiration is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-104, renewal notice, suspension.

RAG test markers: page-006; control-102; anchor-LEGAL-104.

Article 5 — Confidentiality

Section purpose. This section describes confidential information and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Confidential information

Confidential information is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-105, confidentiality, disclosure.

RAG test markers: page-007; control-119; anchor-confidentiality.

Article 6 — Data Protection

Section purpose. This section describes processing instructions and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Processing instructions

Processing instructions is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-106, DPA, subprocessor.

RAG test markers: page-008; control-136; anchor-subprocessor.

Article 7 — Information Security

Section purpose. This section describes incident response and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Incident response

Incident response is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-107, security incident, BCP.

RAG test markers: page-009; control-153; anchor-LEGAL-107.

Article 8 — Intellectual Property

Section purpose. This section describes open source and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Open source

Open source is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-108, background IP, license.

RAG test markers: page-010; control-170; anchor-background IP.

Article 9 — Warranties

Section purpose. This section describes mutual warranties and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Mutual warranties

Mutual warranties is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-109, warranty, remedy.

RAG test markers: page-011; control-187; anchor-remedy.

Article 10 — Indemnification

Section purpose. This section describes third-party claims and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Third-party claims

Third-party claims is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-110, indemnification, third-party claim.

RAG test markers: page-012; control-204; anchor-LEGAL-110.

Article 11 — Limitation of Liability

Section purpose. This section describes liability cap and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Liability cap

Liability cap is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-111, liability cap, excluded damages.

RAG test markers: page-013; control-221; anchor-liability cap.

Article 12 — Compliance

Section purpose. This section describes records and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Records

Records is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-112, compliance, records.

RAG test markers: page-014; control-238; anchor-records.

Article 13 — Audit & Assurance

Section purpose. This section describes audit rights and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Audit rights

Audit rights is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-113, audit right, assurance.

RAG test markers: page-015; control-255; anchor-LEGAL-113.

Article 14 — Personnel

Section purpose. This section describes subcontractors and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Subcontractors

Subcontractors is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-114, personnel, subcontractor.

RAG test markers: page-016; control-272; anchor-personnel.

Article 15 — Business Continuity

Section purpose. This section describes recovery objectives and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Recovery objectives

Recovery objectives is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-115, RTO, RPO.

RAG test markers: page-017; control-289; anchor-RPO.

Article 16 — Change Management

Section purpose. This section describes records and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Records

Records is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-116, change order, emergency change.

RAG test markers: page-018; control-306; anchor-LEGAL-116.

Article 17 — Service Levels

Section purpose. This section describes availability and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Availability

Availability is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-117, SLA, severity 1.

RAG test markers: page-019; control-323; anchor-SLA.

Article 18 — Dispute Resolution

Section purpose. This section describes good-faith negotiation and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Good-faith negotiation

Good-faith negotiation is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-118, dispute notice, mediation.

RAG test markers: page-020; control-340; anchor-mediation.

Article 19 — Termination

Section purpose. This section describes transition and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Transition

Transition is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-119, termination, transition.

RAG test markers: page-021; control-357; anchor-LEGAL-119.

Article 20 — General Terms

Section purpose. This section describes entire agreement and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Entire agreement

Entire agreement is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-120, notice, force majeure.

RAG test markers: page-022; control-374; anchor-notice.

Schedule A — Services

Section purpose. This section describes service catalog and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Service catalog

Service catalog is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-201, Schedule A, deliverable.

RAG test markers: page-023; control-391; anchor-deliverable.

Schedule B — Security Controls

Section purpose. This section describes encryption and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Encryption

Encryption is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-202, encryption, logging.

RAG test markers: page-024; control-408; anchor-LEGAL-202.

Schedule C — Data Processing

Section purpose. This section describes retention and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Retention

Retention is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-203, retention, deletion.

RAG test markers: page-025; control-425; anchor-retention.

Schedule D — SLA Matrix

Section purpose. This section describes escalation and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Escalation

Escalation is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-204, 99.5%, Severity 2.

RAG test markers: page-026; control-442; anchor-Severity 2.

Schedule E — Pricing

Section purpose. This section describes subscription and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Subscription

Subscription is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-205, rate card, pricing.

RAG test markers: page-027; control-459; anchor-LEGAL-205.

Schedule F — Subprocessor Register

Section purpose. This section describes locations and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Locations

Locations is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-206, subprocessor, location.

RAG test markers: page-028; control-476; anchor-subprocessor.

Schedule G — Exit Plan

Section purpose. This section describes access removal and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Access removal

Access removal is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-207, exit plan, data export.

RAG test markers: page-029; control-493; anchor-data export.

Exhibit 1 — Order Form

Section purpose. This section describes signature blocks and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Signature blocks

Signature blocks is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-301, order form, signature.

RAG test markers: page-030; control-510; anchor-LEGAL-301.

Exhibit 2 — Security Incident Form

Section purpose. This section describes incident date and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Incident date

Incident date is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-302, incident form, severity.

RAG test markers: page-031; control-527; anchor-incident form.

Exhibit 3 — Change Request Form

Section purpose. This section describes business reason and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Business reason

Business reason is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-303, change request, approval.

RAG test markers: page-032; control-544; anchor-approval.

Exhibit 4 — Data Inventory

Section purpose. This section describes purpose and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Purpose

Purpose is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-304, data inventory, classification.

RAG test markers: page-033; control-561; anchor-LEGAL-304.

Exhibit 5 — Governance Calendar

Section purpose. This section describes renewal review and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Renewal review

Renewal review is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-305, governance, quarterly review.

RAG test markers: page-034; control-578; anchor-governance.

Exhibit 6 — Signature & Acknowledgment

Section purpose. This section describes execution and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Execution

Execution is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-306, effective date, authorized representative.

RAG test markers: page-035; control-595; anchor-authorized representative.

Article 1 — Definitions

Section purpose. This section describes personal data and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Personal Data

Personal Data is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-101, Personal Data, Services.

RAG test markers: page-036; control-612; anchor-LEGAL-101.

Article 2 — Scope of Services

Section purpose. This section describes change requests and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Change requests

Change requests is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-102, SOW-07, acceptance.

RAG test markers: page-037; control-629; anchor-SOW-07.

Article 3 — Fees & Payment

Section purpose. This section describes disputed amounts and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Disputed amounts

Disputed amounts is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-103, NET-30, invoice dispute.

RAG test markers: page-038; control-646; anchor-invoice dispute.

Article 4 — Term & Renewal

Section purpose. This section describes initial term and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Initial term

Initial term is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-104, renewal notice, suspension.

RAG test markers: page-039; control-663; anchor-LEGAL-104.

Article 5 — Confidentiality

Section purpose. This section describes permitted disclosure and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Permitted disclosure

Permitted disclosure is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-105, confidentiality, disclosure.

RAG test markers: page-040; control-680; anchor-confidentiality.

Article 6 — Data Protection

Section purpose. This section describes data subject requests and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Data subject requests

Data subject requests is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-106, DPA, subprocessor.

RAG test markers: page-041; control-697; anchor-subprocessor.

Article 7 — Information Security

Section purpose. This section describes business continuity and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Business continuity

Business continuity is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-107, security incident, BCP.

RAG test markers: page-042; control-714; anchor-LEGAL-107.

Article 8 — Intellectual Property

Section purpose. This section describes background ip and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Background IP

Background IP is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-108, background IP, license.

RAG test markers: page-043; control-731; anchor-background IP.

Article 9 — Warranties

Section purpose. This section describes service warranty and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Service warranty

Service warranty is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-109, warranty, remedy.

RAG test markers: page-044; control-748; anchor-remedy.

Article 10 — Indemnification

Section purpose. This section describes procedure and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Procedure

Procedure is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-110, indemnification, third-party claim.

RAG test markers: page-045; control-765; anchor-LEGAL-110.

Article 11 — Limitation of Liability

Section purpose. This section describes exceptions and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Exceptions

Exceptions is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-111, liability cap, excluded damages.

RAG test markers: page-046; control-782; anchor-liability cap.

Article 12 — Compliance

Section purpose. This section describes applicable law and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Applicable law

Applicable law is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-112, compliance, records.

RAG test markers: page-047; control-799; anchor-records.

Article 13 — Audit & Assurance

Section purpose. This section describes evidence and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Evidence

Evidence is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-113, audit right, assurance.

RAG test markers: page-048; control-816; anchor-LEGAL-113.

Article 14 — Personnel

Section purpose. This section describes training and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Training

Training is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-114, personnel, subcontractor.

RAG test markers: page-049; control-833; anchor-personnel.

Article 15 — Business Continuity

Section purpose. This section describes testing and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Testing

Testing is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-115, RTO, RPO.

RAG test markers: page-050; control-850; anchor-RPO.

Article 16 — Change Management

Section purpose. This section describes change request and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Change request

Change request is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-116, change order, emergency change.

RAG test markers: page-051; control-867; anchor-LEGAL-116.

Article 17 — Service Levels

Section purpose. This section describes support severity and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Support severity

Support severity is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-117, SLA, severity 1.

RAG test markers: page-052; control-884; anchor-SLA.

Article 18 — Dispute Resolution

Section purpose. This section describes mediation and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Mediation

Mediation is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-118, dispute notice, mediation.

RAG test markers: page-053; control-901; anchor-mediation.

Article 19 — Termination

Section purpose. This section describes survival and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Survival

Survival is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-119, termination, transition.

RAG test markers: page-054; control-918; anchor-LEGAL-119.

Article 20 — General Terms

Section purpose. This section describes notices and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Notices

Notices is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-120, notice, force majeure.

RAG test markers: page-055; control-935; anchor-notice.

Schedule A — Services

Section purpose. This section describes deliverables and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Deliverables

Deliverables is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-201, Schedule A, deliverable.

RAG test markers: page-056; control-952; anchor-deliverable.

Schedule B — Security Controls

Section purpose. This section describes logging and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Logging

Logging is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-202, encryption, logging.

RAG test markers: page-057; control-969; anchor-LEGAL-202.

Schedule C — Data Processing

Section purpose. This section describes deletion and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Deletion

Deletion is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-203, retention, deletion.

RAG test markers: page-058; control-986; anchor-retention.

Schedule D — SLA Matrix

Section purpose. This section describes availability target and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Availability target

Availability target is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-204, 99.5%, Severity 2.

RAG test markers: page-059; control-006; anchor-Severity 2.

Schedule E — Pricing

Section purpose. This section describes professional services and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Professional services

Professional services is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-205, rate card, pricing.

RAG test markers: page-060; control-023; anchor-LEGAL-205.

Schedule F — Subprocessor Register

Section purpose. This section describes service purpose and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Service purpose

Service purpose is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-206, subprocessor, location.

RAG test markers: page-061; control-040; anchor-subprocessor.

Schedule G — Exit Plan

Section purpose. This section describes certificate of deletion and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Certificate of deletion

Certificate of deletion is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-207, exit plan, data export.

RAG test markers: page-062; control-057; anchor-data export.

Exhibit 1 — Order Form

Section purpose. This section describes order details and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Order details

Order details is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-301, order form, signature.

RAG test markers: page-063; control-074; anchor-LEGAL-301.

Exhibit 2 — Security Incident Form

Section purpose. This section describes severity and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Severity

Severity is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-302, incident form, severity.

RAG test markers: page-064; control-091; anchor-incident form.

Exhibit 3 — Change Request Form

Section purpose. This section describes impact and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Impact

Impact is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-303, change request, approval.

RAG test markers: page-065; control-108; anchor-approval.

Exhibit 4 — Data Inventory

Section purpose. This section describes retention and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Retention

Retention is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-304, data inventory, classification.

RAG test markers: page-066; control-125; anchor-LEGAL-304.

Exhibit 5 — Governance Calendar

Section purpose. This section describes quarterly review and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Quarterly review

Quarterly review is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-305, governance, quarterly review.

RAG test markers: page-067; control-142; anchor-governance.

Exhibit 6 — Signature & Acknowledgment

Section purpose. This section describes execution and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Execution

Execution is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-306, effective date, authorized representative.

RAG test markers: page-068; control-159; anchor-authorized representative.

Article 1 — Definitions

Section purpose. This section describes affiliate and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Affiliate

Affiliate is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-101, Personal Data, Services.

RAG test markers: page-069; control-176; anchor-LEGAL-101.

Article 2 — Scope of Services

Section purpose. This section describes acceptance and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Acceptance

Acceptance is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-102, SOW-07, acceptance.

RAG test markers: page-070; control-193; anchor-SOW-07.

Article 3 — Fees & Payment

Section purpose. This section describes fees and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Fees

Fees is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-103, NET-30, invoice dispute.

RAG test markers: page-071; control-210; anchor-invoice dispute.

Article 4 — Term & Renewal

Section purpose. This section describes renewal and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Renewal

Renewal is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-104, renewal notice, suspension.

RAG test markers: page-072; control-227; anchor-LEGAL-104.

Article 5 — Confidentiality

Section purpose. This section describes security measures and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Security measures

Security measures is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-105, confidentiality, disclosure.

RAG test markers: page-073; control-244; anchor-confidentiality.

Article 6 — Data Protection

Section purpose. This section describes subprocessors and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Subprocessors

Subprocessors is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-106, DPA, subprocessor.

RAG test markers: page-074; control-261; anchor-subprocessor.

Article 7 — Information Security

Section purpose. This section describes security program and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Security program

Security program is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-107, security incident, BCP.

RAG test markers: page-075; control-278; anchor-LEGAL-107.

Article 8 — Intellectual Property

Section purpose. This section describes developed materials and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Developed materials

Developed materials is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-108, background IP, license.

RAG test markers: page-076; control-295; anchor-background IP.

Article 9 — Warranties

Section purpose. This section describes disclaimer and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Disclaimer

Disclaimer is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-109, warranty, remedy.

RAG test markers: page-077; control-312; anchor-remedy.

Article 10 — Indemnification

Section purpose. This section describes exclusions and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Exclusions

Exclusions is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-110, indemnification, third-party claim.

RAG test markers: page-078; control-329; anchor-LEGAL-110.

Article 11 — Limitation of Liability

Section purpose. This section describes direct damages and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Direct damages

Direct damages is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-111, liability cap, excluded damages.

RAG test markers: page-079; control-346; anchor-liability cap.

Article 12 — Compliance

Section purpose. This section describes anti-bribery and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Anti-bribery

Anti-bribery is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-112, compliance, records.

RAG test markers: page-080; control-363; anchor-records.

Article 13 — Audit & Assurance

Section purpose. This section describes soc reports and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

SOC reports

SOC reports is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-113, audit right, assurance.

RAG test markers: page-081; control-380; anchor-LEGAL-113.

Article 14 — Personnel

Section purpose. This section describes removal and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Removal

Removal is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-114, personnel, subcontractor.

RAG test markers: page-082; control-397; anchor-personnel.

Article 15 — Business Continuity

Section purpose. This section describes continuity plan and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Continuity plan

Continuity plan is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-115, RTO, RPO.

RAG test markers: page-083; control-414; anchor-RPO.

Article 16 — Change Management

Section purpose. This section describes impact assessment and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Impact assessment

Impact assessment is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-116, change order, emergency change.

RAG test markers: page-084; control-431; anchor-LEGAL-116.

Article 17 — Service Levels

Section purpose. This section describes response targets and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Response targets

Response targets is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-117, SLA, severity 1.

RAG test markers: page-085; control-448; anchor-SLA.

Article 18 — Dispute Resolution

Section purpose. This section describes arbitration and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Arbitration

Arbitration is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-118, dispute notice, mediation.

RAG test markers: page-086; control-465; anchor-mediation.

Article 19 — Termination

Section purpose. This section describes termination for cause and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Termination for cause

Termination for cause is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-119, termination, transition.

RAG test markers: page-087; control-482; anchor-LEGAL-119.

Article 20 — General Terms

Section purpose. This section describes assignment and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Assignment

Assignment is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-120, notice, force majeure.

RAG test markers: page-088; control-499; anchor-notice.

Schedule A — Services

Section purpose. This section describes milestones and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Milestones

Milestones is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-201, Schedule A, deliverable.

RAG test markers: page-089; control-516; anchor-deliverable.

Schedule B — Security Controls

Section purpose. This section describes vulnerability management and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Vulnerability management

Vulnerability management is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-202, encryption, logging.

RAG test markers: page-090; control-533; anchor-LEGAL-202.

Schedule C — Data Processing

Section purpose. This section describes data categories and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Data categories

Data categories is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail. Standard review targets are five business days unless a stricter service level is stated elsewhere. Reference terms include: LEGAL-203, retention, deletion.

RAG test markers: page-091; control-550; anchor-retention.

Schedule D — SLA Matrix

Section purpose. This section describes severity matrix and establishes the operating expectations used by Northstar Digital Solutions Pvt. Ltd.. It is written as a controlled synthetic record for retrieval testing.

Severity matrix

Severity matrix is governed through documented responsibilities, approval paths, and periodic review. Employees should use the current controlled version when a conflict exists between local notes and an approved policy. The accountable owner maintains records and coordinates exceptions.

Operational detail: requests are normally submitted through the designated service channel, assigned to an accountable owner, and retained with an audit trail.
